Hospital Privileging and Neurocritical Care

The mission of the Neurocritical Care Society is to improve outcomes for patients with life-threatening neurological illnesses. In order to fulfill this mission, we believe that it is the responsibility of an individual hospital and its medical staff to determine a critical care privileging policy that ensures optimal care for their patients based on the available neurological, neurosurgical and critical care resources at that hospital irrespective of the parent specialty of a specific practitioner.

Approved by the NCS Executive Committee and Board of Directors on 9/15/09

Please contact the NCS Executive Office at (952) 646-2034 or info@neurocriticalcare.org with any questions.
