

## NCS PODCAST SERIES

Take NCS learning on the go with the expansive NCS Podcast, featuring four unique series: 1) Perspectives (Personal experiences from leaders in the field to Stories of Hope), 2) Hot Topics (Everything that is new and now in neurocritical care), 3) Masters Class (Advice and lessons from the "masters" in neurocritical care) and 4) INSIGHTS (Specific topics from Neurocritical Care ON CALL®).

**CE Up to 0.5 CE per episode**

## PHARMACOTHERAPY OF NEUROCRITICAL CARE SERIES (PONS)

The Pharmacotherapy of Neurocritical Care Series (PONS) is a curriculum-based virtual series comprised of various neuropharmacotherapy topics

presented by experts in the field of neurocritical care. PONS can be used as a review for healthcare professionals, to facilitate topic discussions among trainees, to educate trainees or to serve as a group educational lecture series. **CE Up to 24.5 CE**

## N-CASE NURSING RESOURCES

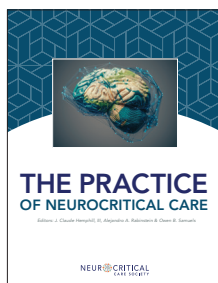

N-Case NCS Nursing Resources provides nursing-related education for health care

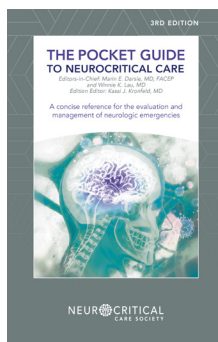

professionals working in neurocritical care. Resources include basic and advanced nursing neurological assessments, links to helpful nursing resources and online self-paced case studies focusing on acute and challenging traumatic brain injury.

**CE Up to 7 CE**

## PUBLICATIONS

*The Practice of Neurocritical Care* is authored and published exclusively by physician, nursing and pharmacy leaders in the field. This textbook includes a range of topics and can be used as part of preparation for the neurocritical care certification examination, or for the neurocritical care portion of the boards for neurology, neurosurgery or other critical care specialties.

Available as a print piece, *The Pocket Guide to Neurocritical Care* serves as a quick reference guide for management of the most common emergencies and highest-yield topics encountered in neurocritical care. Within each chapter, readers learn about the pathophysiology/etiology, risk factors, work-up, treatment and management principles, disease course and prognostic considerations and differential diagnoses for the disease state.

## NEUROCRITICAL CARE SOCIETY

# Educational Products Guide

## Continuing Education Resources You Need, All in One Place

The Neurocritical Care Society is dedicated to providing the leading education, certification courses and clinical resources to support health care providers focused on life-threatening neurological illnesses — from webinars and podcasts to publications and certification courses — all available on the new NCS Learning Center.

**Scan to browse the NCS Learning Center.**

## BRAIN DEATH DETERMINATION

### BRAIN DEATH DETERMINATION

While there exists a legal provision for brain death, institutional protocols for diagnosis are not universal and are often absent; no specific criteria for diagnosis is mandated. The Brain Death Determination Certification Course aims to standardize the process of brain death diagnosis. This credentialing tool will help those clinicians — who are allowed by their local laws to perform brain death determination — learn and demonstrate their level of understanding and expertise. **CE Up to 2 CE**

## EMERGENCY NEUROLOGICAL LIFE SUPPORT (ENLS®)

Emergency Neurological Life Support (ENLS®) is designed to provide users advisory instruction regarding management of the first few hours of a neurological emergency. Through self-paced online or live training formats, the course content offers 14 modules, each addressing a distinct category of neurological injury. New as part of version 5.0, there is also an online simulation now available. A printed and bound version of the ENLS® manuscript serves as an excellent course companion and is available for purchase along with the course. **CE Up to 15 CE**

## ESSENTIALS OF NEUROCRITICAL CARE

The Essentials of Neurocritical Care (Essentials) course teaches the essential topics of neurocritical care through online course materials. This online only course includes 14 required core modules with recorded lectures and examinations.

Participants who are certified in Emergency Neurological Life Support (ENLS) will find this course to be an excellent next step in training, as it goes beyond the first few hours of a neurologic emergency to cover pathophysiology, diagnostic studies, treatment, and transition to discharge. **CE Up to 20 CE**

## NEUROCRITICAL CARE ON CALL®

The most up-to-date, comprehensive online resource dedicated to the practice of neurocritical care. Neurocritical Care ON CALL® is a subscription-based resource that covers more than 20 educational topics. Gain exclusive access to case studies, videos, monthly webinars, podcasts, and more — all focused on the neurocritical care specialty. **CE Up to 50 CE**

## BRAIN DEATH TOOLKIT

The Brain Death Toolkit is a free resource that provides a variety of helpful resources and educational offerings, including instructional videos and web-based courses. It also includes a sample brain death policy and checklist (which may be used as a template for adoption at individual institutions/hospitals), resources to explain the challenges in brain death determination and Frequently Asked Questions for medical practitioners and the general public.

## APP ORIENTATION COURSE

The Advanced Practice Provider (APP) Orientation Course is a resource designed for APPs and healthcare professionals working in the field of neurocritical care. It includes organized resources covering a wide variety of foundational content (neuroanatomy, neuroradiology, and the in-depth neurological examination) as well as disease-specific content for an array of diagnoses encountered in neurocritical care. Each topic outlines required foundational content as well as suggested resources for APPs looking for a deeper understanding of neurocritical care content.

Included in the course purchase is a copy of *The Pocket Guide to Neurocritical Care*, relevant Emergency Neurological Life Support (ENLS®) content, a subscription to Neurocritical Care ON CALL®, the APP Neuroanatomy Webinar Series and relevant Pharmacotherapy of Neurocritical Care Series (PONS) content.

**CE Up to 47.25 CE**

## PHARMACOLOGY ORIENTATION COURSE

The Pharmacology Orientation Course is a resource

designed specifically for pharmacists, physicians, trainees and other healthcare professionals seeking specialized knowledge as it relates to pharmacological treatment strategies. Comprised of 26 modules, the course includes review material on neurology foundations, neurocritical care skills, pathology and disease specific content. It includes topics on infectious disease, pain, agitation and delirium, and neuropharmacology. Also included are recommended procedures in the neurocritical care environment, including immunosuppressive therapies, supportive care, medication safety, ethics and prognostic assessment. **CE Up to 47.25 CE**

## ETHICS CURRICULUM FOR NEUROCRITICAL CARE FELLOWSHIPS

The Ethics Curriculum for Neurocritical Care Fellowships covers general introductory concepts in medical ethics as they relate to neurocritical care. Including topics such as medical ethics, organ donation, medical futility, moral fatigue and decision-making support, this resource is a must have for all entering the neurocritical care field.

## BOARD REVIEW COURSE

The NCS Neurocritical Care Board Review Question Bank is a great online tool to

help you prepare for neurocritical care boards. The question bank includes more than 150 questions. Each answer comes with a high-yield concept which is quick to review, a detailed rationale covering all answer choices and appropriate references to take your knowledge deeper. The questions strategically cover the content blueprint disclosed by the ABPN and UCNS for neurocritical care certification.
